Deer Hunting Report

License Year 1999

Harvest Surveys

Montana Fish Wildlife and Parks

July 11, 2000

Introduction

This report contains and analysis and summary of license year 1999 (LY99) Montana deer hunter survey response information specifically related to deer hunters, the days devoted to deer hunting, and the success they reported hunting for deer. The accompanying **Deer Harvest Report** summarizes license year 1999 deer harvest and kill characteristics.

Estimates of the number of deer hunters, number of hunter days devoted to deer hunting, and number of successful deer hunters, are presented for residents, non-residents, and combined residencies, at the hunting District, Regional, and Statewide levels. Confidence bounds at the 80% significance level are presented, as are various ratios based on these statistics. Counts of deer license holders, number sampled, and number of responses actually used, as well as rates and the expansion factors used are also presented.

Most deer licenses sold allow the taking of either species, subject to local District regulation. It is assumed that deer hunters expend effort hunting for either species of deer, and generally cannot separate the effort they devote to each species, mule deer and white-tailed deer. Therefore, deer hunting information is summarized for both deer species combined.

Throughout this report, sportspersons holding a privilege to hunt deer are referred to using three different terms. **Deer sportspersons** held a privilege, or multiple privileges, to hunt deer. **Deer hunters** took advantage of this privilege and expended effort hunting deer. **Successful deer hunters** succeeded in taking one or more deer.

Expansion Factors for Deer Hunting Statistics

Table 1 presents the derivation of the expansion factors used in the deer hunting analysis. The 1999 license database provided absolute counts of the number of resident and non-resident **sportspersons** having some privilege to hunt deer, either through a general deer license, a combination license, or a special license or permit. A **random sample** was drawn from this population of potential deer hunters, approximately **51% of residents and 56% of non-residents**. Attempts were made to contact all of these hunters and ask for their response to the LY99 Deer Hunting and Harvest Questionnaire (**see enclosures**). Residents were primarily contacted by phone, while non-residents were reached by mail. Approximately **68% of sampled residents and 47% of sampled non-residents returned usable**

responses. The **overall response rate**, the proportion of potential deer hunters whose responses were actually used in the deer hunter analysis, came to **34% for residents and 26% for non-residents**.

The **expansion factor** used to estimate numbers of hunters and hunter days based on the sample response is simply the inverse of the response rate. Three Statewide expansion factors are used in the **deer hunting analysis**, one for **residents**, one for **non-residents**, and one for **combined residencies**. These factors are used to estimate statistics for these residency groupings at all 3 levels of location grouping, the **Statewide level**, the **Regional level**, and the **hunting District level**. Because hunters may generally expend deer hunting effort in any number of Districts, there is no absolute number of potential deer sportspersons at the Region or District level, and expansion factors cannot be derived at these levels.

The use of Statewide expansion factors to estimate hunter effort statistics down to the District level was changed during license year 1996. In deer hunting statistics tables prior to 1996, the estimated statistics at the combined residency level were simple sums of the resident and non-resident estimates. Any difference between these sums and the combined total in the report resulted from simple round off error. However, beginning in 1996, **the combined residency statistics are estimates made without regard to residency, they are not simple sums of the resident and non-resident statistics**. The expansion factor is based on total sportspersons with privilege to hunt deer, without regard to their residency, compared to the responses used from those sportspersons.

The purpose of this change is to make the hunting statistics at the combined residency level best estimates when residency is disregarded. Combined residency statistics now have the same statistical derivation as estimates made when residency is taken into account. However, **the resident and non-resident estimates will not necessarily sum to the combined residency estimate**. This relates directly back to the fact that these numbers are estimates, based on an underlying set of statistical assumptions. The precision and accuracy of these estimates will depend on a number of factors. Factors influencing an estimate include the relative proportion of the population of deer sportspersons providing the responses used in the estimation of the statistic, and the relative distribution of answers to underlying survey response questions.

All statistics presented are estimates based on the underlying response set for that grouping level and the expansion factor applied to that level. Hunting statistics at all three levels of location grouping (District, Regional, and Statewide) are separate estimates, rather than sums of underlying estimates. Regional estimates are made without regard to reported hunting District use within the Region. Statewide estimates are derived without regard to reported hunting District use.

Summary Statistics Table from Overall Deer Sportsperson Responses

Table 2 presents an overall Statewide summary of basic deer sportsperson response information. These statistics are derived from the 2 most basic questions asked on the deer survey response form:

- **Did you hunt deer?**
- **How many deer did you kill?**

Statewide estimates and 80% confidence bounds on **the number of hunters, the number of successful hunters, the total number deer harvested, for resident, non-resident, and all deer sportspersons** are presented. Various ratios are derived from these statistics. **Percent hunting** is the percent of deer sportspersons that actually hunted deer. **Percent success** is the percent of those hunting that succeeded in taking one or more deer. **Holders to kill** is the ratio of sportspersons holding one or more deer hunting privileges to the number of harvested deer. **Deer per hunter** is the ratio of the number of harvested deer to the number of active hunters. **Deer per successful hunter** is the ratio of the number of harvested deer to the number of successful hunters. During the LY99 hunting season, **87%** of resident

and **88%** of non-resident deer license holders actively hunted for deer. The overall percent success was **57%** for residents and **65%** for non-residents.

1999 Deer Hunting Summary Statistics Tables

Table 3 presents license year 1999 deer hunting related statistics at the three levels of location grouping (State, Regional, and hunting District), and the 3 residency groups (combined residencies, residents, non-residents). Regional categories include Regions 1 through 7, plus a category for hunter responses not identifiable to any given Region (**Region U**). District categories include all deer hunting Districts where responses indicated hunting activity, plus categories **1XX** through **7XX** for activity identifiable to a Region but not a District, and category **XXX** for activity not identifiable to any Region. The table begins with the Statewide and Regional statistics, then continues on to the District level statistics.

Deer hunting related estimates and corresponding 80% confidence bounds presented for each location and residency grouping include:

Hunters: Number of active deer hunters.
Hunter Days: Sum of number of days or partial days spent hunting deer by all hunters.
Success Hunters: **Successful hunters.** Number of hunters harvesting 1 or more deer.

Various ratios are computed based on these statistics:

Days Per Hunter: Number of hunter days divided by number of active hunters.
Percent Success: Percent of active hunters that were successful hunters (took one or more deer).

At the Statewide and Regional level other estimates and ratios have meaning:

Districts Hunted: Sum of number of Districts reported used by all active deer hunters.
Districts Per Hunter: Districts hunted divided by number of active hunters.
Days Per District: Hunter days divided by Districts hunted.

Deer hunters may hunt and harvest in many Districts and Regions. A hunter contributes to the estimated number of hunters, hunter days, and hunter success in any District he/she reported hunting activity and/or success. Likewise, a hunter contributes to these statistics in any Region he/she reported activity. All responding deer hunters contribute to the Statewide statistics. Because a single hunter may contribute to the statistics in a number of Districts within a Region, but contributes only once to the statistics for a given Region, sums of hunters and successful hunters across Districts will not approximate the Regional statistics. Similarly, sums of Regional statistics will not approximate the Statewide statistics.

In **Table 3** there are a few hunting Districts where deer hunting was reported, but no deer kills. In these cases the number of successful hunters, the confidence bounds on successful hunters, and the percent success are filled with zeros.

Deer Harvest Report

License Year 1999

Harvest Surveys

Montana Fish Wildlife and Parks

July 19, 2000

Introduction

This report contains an analysis and summary of license year 1999 (LY99) Montana deer hunter survey response information specifically related to the number and characteristics of deer harvested. An accompanying **Deer Hunting Report** summarizes LY99 deer hunter and hunting effort information.

Statistical estimates are presented by deer species (combined, mule deer, and white-tailed deer), location (Statewide, Region, and hunting District), residency (combined residency, MT residents, and non-residents), and license/permit type (all types, grouped license categories, and specific license types). Due to the number of statistics generated, and the variety of ways the statistics may be used and compared, the information is presented in two different sort orders, and three different report table types.

The two basic sort orders are:

- **Species Comparison Tables:** These tables are intended to promote comparison of statistics between the species, within a given location. Species include mule deer (**MD**), white-tailed deer (**WT**), and a category which summarized response data without regard to species (combined, **DE**). Species comparison tables present statistics at the Statewide and Regional location levels only, by residency, and grouped license/permit categories.

- **Single Species Tables:** These tables organize the statistics to promote comparison within and between locations, for a given species, either mule deer or white-tailed deer. They present statistics at all grouping levels of location, residency, and license/permit type.

The three currently included report table types are:

- **Deer Harvest Table:** Tags issued, expansion factors used, estimated total harvest, harvest by sex-age class, harvest of antlered/antlerless deer, and harvest by bow.

- **Buck Antler Summary Table:** Estimated buck harvest, bucks harvested in the legal antler length class, and antlered buck harvest by antler point class. Mule Deer summaries include separate antler point class estimates for those without and those with brow tines (see below).

- **Deer Time Period of Kill Table:** Estimated total harvest, harvest by time period, and percent harvest by time period.

Throughout this report, **Location** categories **'Reg U'** and **'XXX'** refer to deer which were harvested somewhere in Montana, but in an unknown Region or hunting District. Location **1XX...7XX** refer to deer harvested somewhere within a given Region, but in an unknown District. **Residency** (**Res**) is abbreviated as **R** (resident), **N** (non-resident), or **ALL** (R+N combined).

License/permit types (Lic Type or Lpt) are presented at three levels. Each deer kill reported by a hunter was linked to one or more **specific deer license/permit types** held by that hunter. This linkage was based on reported District of kill, species, sex/age characteristics, and time period of kill. Specific types included general A tags (**General**), "single Region antlerless whitetail B" (**SRAWT B**), individual special licenses and permits issued through drawings or over the counter (designated by a **5 digit code** which is defined in the **1999 Deer Hunting Regulations** summarized in **Appendix A**), or **Unknown** for those kills which could not be linked to any license/permit type held by the hunter and valid in the District for the given described kill. At the Statewide and Regional location levels, license types were lumped into **license categories.** The **Special** category grouped together all special licenses, while **General**, **SRAWT B**, and **Unknown** were defined as above. LY99 non-resident special licenses **49800, 69800, and 79800** were grouped as **SRAWT B** at the Statewide and Regional levels. The final level of license type **ALL** indicates that the harvest statistics were computed and expanded without regard to license/permit type.

Expansion Factors for Deer Harvest Statistics

All deer harvest statistics presented are estimates based on the underlying response set for a particular combination of the various levels of species, location, hunter residency, and license/permit type. Summarized harvest results from survey responses are expanded to estimated statistics based on the ratio of tags issued to tags held by responding successful hunters. **Deer harvest expansion factors were computed at all levels and groupings of species, location, hunter residency, and license/permit type.** The number of tags issued, and the expansion factors used to estimate the harvest statistics, are presented in the Deer Harvest Tables.

In license year 1995 and before, deer harvest statistics expansion was performed only at the most detailed level, and then the expanded harvest statistics for the license types were simply summed to get estimates for higher groupings of species, location, residency, and license type. Therefore, in those reports, the sum of harvest by license type equaled harvest across license types. For reports after 1995, expanded statistics at the higher groupings of these variables are themselves estimates, not sums of estimates. They are based on expansion factors computed from ratios of tags, given the particular grouping of species, location, residency, and license type. This explains why a harvest estimate for a species, at a location, for a given residency, over all license types, may differ from the sum of the underlying license type estimates. The overall expansion factor is a weighted combination of the underlying expansion factors. The more heterogeneous the underlying subpopulations, the more the overall estimates will vary from the sum of the underlying estimates.

Harvest statistics at the combined residency level are estimates when residency is disregarded. They are not simple sums of the resident and non-resident estimates. Resident and non-resident estimates will not necessarily sum to the combined residency estimate. Similarly, hunting statistics at the combined species level are estimates when deer species is disregarded. They are not simple sums of the mule and white-tailed deer estimates. In addition, some kills not identified to species are included at the combined species level. Separate estimates are also computed at all three levels of location (District, Regional, and Statewide). Regional estimates are made without regard to reported District of kill within the Region. Statewide estimates are derived without regard to any reported District of kill.

In some cases, at the most detailed summary level by Species, Location, Residency, and License/Permit Type, **no response data** were returned. In these cases, the **expansion factor was undefined** (license holders divided by zero responses), and flagged in the tables as **–0.000**. All estimates of harvest statistics based on the undefined expansion factor are also undefined **(–0)**. In other cases, response data was returned, but no sportspersons reported any kills. This resulted in **undefined ratios**. These were also flagged as **–0.0**.

Deer Harvest Table

The deer harvest tables present basic harvest estimates, total harvest, harvest by sex-age classes, harvest by antlered/antlerless classes, and harvest by bow. The number of valid tags issued and expansion factors used are also presented in the harvest tables. The following expanded statistics were computed by species, location, hunter residency, and license/permit type:

- **Number Issued:** Number of valid deer tags issued.
- **Expand Factor (Expansion Factor):** The ratio of the number of tags issued to the number of tags held by responding successful deer hunters.
- **Harvest:** Point estimate of total number of deer harvested.
- **Harvest Low Bnd:** Lower bound of 80% confidence interval on total harvest.
- **Harvest Up Bnd:** Upper bound of 80% confidence interval on total harvest.
- **Harvest Unkn:** Point estimate of harvest of sex age class unknown.
- **Harvest Fawns:** Point estimate of harvest of sex age class fawns.
- **Harvest Does:** Point estimate of harvest of sex age class does (non-fawn females).
- **Harvest Bucks:** Point estimate of harvest of sex age class bucks (non-fawn males).
- **Antl? (Antlers Unknown Harvest):** Sum of unknown sex-age and bucks with antlers of unknown length. In years prior to 1996, this statistic was sex-age class unknown only.
- **Antl- (Antlerless Harvest):** Legally antlerless deer. The sum of fawns, does, and bucks with antlers <4 inches in length. In years prior to 1996, this statistic was the sum of fawns and does.
- **Antl+ (Antlered Harvest):** Legally antlered deer. Bucks with antlers >4 inches. In years prior to 1996, this statistic was bucks, regardless of antler length.
- **Pcnt Antl- (Percent Antlerless Harvest):** Percent of harvest classified as legally antlerless deer.
- **BowKill No:** Point estimate of number of deer harvested by a means other than bow and arrow.
- **Bow Kills:** Point estimate of number of deer harvested by bow and arrow.
- **Pcnt Bow+:** Percent of harvest taken by bow and arrow.

The sum of **unknown**, **fawn**, **doe**, and **buck** harvest; the sum of the **Antl-**, **Antl+**, and **Antl?** classes; and the sum of **Bowkill No** and **Bow Kills**; all equal **total harvest**. However, the whole number estimates presented in the tables may not exactly sum to this total due to round off error.

Buck Antler Summary Table

The buck antler summary tables present information relating to buck deer harvested in Montana. Estimates of buck harvest and bucks with legal antlers (greater than 4 inches) are presented for comparison. Legally antlered buck harvest is split into estimates by antler point class. Because antler point information was collected differently for Mule Deer and White-tailed Deer (see below), Buck Antler Summary Tables are presented in the report section for each species, but not in the Species Comparison section.

Beginning in LY98, information collected on Mule Deer buck antler characteristics differed from that collected for White-tailed Deer. For legally antlered Mule Deer buck kills only, successful hunters were asked if the buck had brow tines one inch long or greater on side one and two. Then they were asked how many additional antler points the buck had on side one and side two. White-tailed deer legally antlered buck information remained as in previous years, the number of antler points on side one and side two. Brow tines were included as antler points for White-tailed Deer.

The following expanded statistics were computed by species, location, hunter residency, and license/permit type:

- **Harvest Bucks:** Estimate of harvest of buck sex/age class. Also in Harvest Tables.
- **Antl L >4 inch:** Bucks harvested with maximum antler length >4 inches long. Legally antlered.

For Mule Deer, estimated legal buck harvest is distributed among two brow tine classes:

- **- Brow Tine:** Legally antlered mule deer bucks with no brow-tine on either side.
- **+ Brow Tine:** Legally antlered mule deer bucks with a brow-tine on at least one side.
- **PcntTine -:** Percent legally antlered mule deer bucks with no brow-tine on either side.
- **PcntTine +:** Percent legally antlered mule deer bucks with a brow-tine on at least one side.

Mule deer buck kills **within each of these two brow tine classes** were then distributed among **seven antler point classes**:

- **Pcnt PtCls0:** Percent antlered bucks harvested with maximum one side antler point count unknown or zero. This class collects records with incomplete antler information.
- **Pcnt PtCls1: %** antlered bucks harvested with maximum one side antler point count of 1.
- **Pcnt PtCls2: %** antlered bucks harvested with maximum one side antler point count of 2.
- **Pcnt PtCls3: %** antlered bucks harvested with maximum one side antler point count of 3.
- **Pcnt PtCls4: %** antlered bucks harvested with maximum one side antler point count of 4.
- **Pcnt PtCls5: %** antlered bucks harvested with maximum one side antler point count of 5.
- **Pcnt PtCls6: %** antlered bucks harvested with maximum one side antler point count of 6 or greater.

For White-tailed Deer, bucks were distributed among seven point classes. All were classified as having no brow tines.

To estimate the percent of antlered buck harvest with antlers 4 points or better, sum the percents given for antler point classes 4, 5, and 6.

For Mule Deer, the sum of – **Brow Tine and + Brow Tine** equals **harvest of antlered bucks**. Within Brow Tine class, the sum of Ant Pt Cls 0,1,2,3,4,5,6 equals the total for the brow tine class. The whole number estimates presented in the tables may not exactly sum to this total due to round off error. **For White-tailed Deer**, the sum of **Ant Pt Cls 0,1,2,3,4,5,6** equals the total for – **Brow Tine**, which equals **harvest of antlered bucks**.

Deer Time Period of Kill Table

The deer time period of kill tables present estimates of deer harvest distributed among **seven different time periods, plus a category where time period of kill is unknown**. The time periods correspond to pre-season, the 5 weeks of the general hunting season, and post-season. Percent harvest by time period is also presented. Estimates were computed by species, location, hunter residency, and license/permit type.

- **Total Harvest:** Estimate of total number of deer killed.
- **Time Unkn:** Estimate of deer harvested where time period was unknown.
- **Before Oct 26:** Estimate of deer harvested during 1st time period, pre-season.
- **Oct 24 – Oct 31:** Estimate of deer harvested during 2nd time period, 1st week of general season.
- **Nov 1 – Nov 7:** Estimate of deer harvested during 3rd time period, 2nd week.
- **Nov 8 - Nov 14:** Estimate of deer harvested during 4th time period, 3rd week.
- **Nov 15 – Nov 21:** Estimate of deer harvested during 5th time period, 4th week.
- **Nov 22 – Nov 28:** Estimate of deer harvested during 6th time period, 5th week.
- **After Nov 28:** Estimate of deer harvested during 7th time period, post-season.
- **Pcnt Unkn:** Estimate of percent of deer harvested where time period was unknown.
- **Pcnt Pre:** Estimate of percent of deer harvested during pre-season.
- **Pcnt Wk 1:** Estimate of percent of deer harvested during 1st week of general season.
- **Pcnt Wk 2:** Estimate of percent of deer harvested during 2nd week.

- **Pcnt Wk 3:** Estimate of percent of deer harvested during 3rd week.
- **Pcnt Wk 4:** Estimate of percent of deer harvested during 4th week.
- **Pcnt Wk 5:** Estimate of percent of deer harvested during 5th week.
- **Pcnt Post:** Estimate of percent of deer harvested during post-season.

The sum of the totals given in the unknown and the 7 known time periods equals total harvest. However, the whole number estimates presented in the report may not exactly sum to this total due to round off error.

The 1999 Deer Hunting Regulations Table

Each deer kill reported by a hunter was linked to one or more specific deer license/permit types held by that hunter. This linkage was based on matching the reported District of kill, species, sex/age characteristics, and time period of kill, to all possible deer tags valid in that District, and held by the responding hunter. The license/permit type definitions used are given in the **1999 Deer Hunting Regulations Table**. Specific types included general A tags (**General=00000**), "single Region antlerless whitetail B" (**SRAWT B=00#00, 49800, 69800, 79800**), and individual special licenses and permits issued through drawings or over the counter (**#####**).

For each **hunting District**, and each **deer species**, each valid **license/permit type** is defined by the following variables:

- **Date_Bgn:** The date the season opened.
- **Date_End:** The date the season closed.
- **Means of Take:** Some combination of **R**ifle, **A**rchery, **M**uzzleloader, and/or **S**hotgun.
- **Sex-Age:** The legal sex/age/antler class of deer allowed by the license.
  - **Either Sex (E0):** Any deer is legal.
  - **Antlerless (E1):** Deer must not have an antler > 4". Fawns and does.
  - **Antlered Buck (M2):** Deer must have an antler > 4". Buck Only.
  - **Antlered Buck 4pt (M3):** Deer must have an antler with at least 4 points. 4pt Buck Only.
- **Regulation Description:** Descriptive information.
- **Regulation Comment:** Further information.

1999 Deer Hunting and Harvest Statistics

Data File Description

Deer Hunting and Harvest Statistics

Description of Data Files

License Year 1999

Montana Fish Wildlife and Parks

Harvest Surveys

July 19, 2000

This document contains a description of the License Year 1999 Deer Hunting and Harvest Statistics data files. These files were exported from the original Oracle data tables used to produce the 1999 Deer Hunting Report and the 1999 Deer Harvest Report. The data is distributed in **Comma Separated Value ASCII text files** where character values are quoted and numeric values are not. Numeric values were exported to 2 decimal places. Headers are not included. The data files have the extension ***.Csv**. They are accompanied by ***.sch** files which some data handling programs are able to use to define the file format and column types. This documentation is available in 3 formats, Word97, Rich Text Format, and Simple Text (**DeData99.Doc, *.Rtf, *.Txt**). Descriptions and column definitions for the two data files are given below:

DeHu99.Csv – Deer Hunting Statistics Data Table

- **Loc (Location)**: **STA**=Statewide; **R01**..**R07,R09**=Regional 1..7,Unknown; ###=Hunting District (100,101,…), #99=Unknown district within region. 999=Unknown district and region.
- **Res (Residency)**: **ALL**=All residencies, **R**=Residents of MT, **N**=Nonresidents.
- **Sports (Sportspersons)**: Number of sportspersons holding privilege to hunt deer.
- **Exp_Fact (Expansion Factor)**: Number deer sportspersons divided by number of valid deer sportsperson responses used in analysis.
- **Hunt (Hunters)**: Point estimate of number of sportspersons actively hunting deer.
- **Hunt_L (Hunters Lower Bound)**: Lower 80% confidence bound on active deer hunters.
- **Hunt_U (Hunters Upper Bound)**: Upper 80% confidence bound on active deer hunters.
- **DistHunt (Districts Hunted)**: Sum of number of districts reported used by all active deer hunters.
- **HDays (Hunter Days)**: Sum of number of days or partial days spent hunting deer by all hunters.
- **HDays_L (Hunter Days Lower Bound)**: Lower 80% confidence bound on hunter days.
- **HDays_U (Hunter Days Upper Bound)**: Upper 80% confidence bound on hunter days.
- **SucHunt (Successful Hunters):**Number of hunters harvesting 1 or more deer.
- **SucHunt_L (SucHunt Lower Bound):** Lower 80% confidence bound on successful hunters.
- **SucHunt_U (Suc Hunt Upper Bound):** Upper 80% confidence bound on successful hunters.
- **PctSuc (Percent Success)**: Percent of hunters that were successful (took one or more deer).

DeHa99.Csv – Deer Harvest Statistics Data Table

- **Spp (Species)**: **DE**=Both species combined, **MD**=Mule deer, **WT**=White-tailed deer.
- **Loc (Location)**: **STA**=Statewide; **R01**..**R07,R09**=Regional 1..7,Unknown; ###=Hunting District (100,101,…), #99=Unknown district within region. 999=Unknown district and region.
- **Res** (Residency): **ALL**=All residencies, **R**=Residents of MT, **N**=Nonresidents.
- **Lpt (License Type)**: **ALL**=all license/permit types combined. **License Categories** (groupings for state and regional analysis) **C0GEN**=General A, **C1SRW**=Single Region Antlerless Whitetail B, **C6SPE**=Special licenses/permits issued through special drawings or over-the-counter, **C9UNK**=Kills not assignable to a license type. **License Types** (individual types for district level analysis) **00000**=General A, **00#00**= Single Region Antlerless

Whitetail B, #####= Special licenses/permits issued through special drawings or over-the-counter, **99999**= Kills not assignable to a license type.

- **Sort_Spp, Loc, Res, Lpt:** Assist in sorting the records.
- **Sales (Number Issued)**: Number of deer licenses/permits issued.
- **Exp_Fact (Expansion Factor)**: Number issued divided by number of licenses/permits held by successful deer sportspersons returning valid responses used in analysis.
- **SucHunt (Successful Hunters):**Number of hunters harvesting 1 or more deer.
- **SucHunt_L (SucHunt Lower Bound):** Lower 80% confidence bound on successful hunters.
- **SucHunt_U (Suc Hunt Upper Bound):** Upper 80% confidence bound on successful hunters.
- **Harv (Harvest):** Pt estimate of number of deer harvested.
- **Harv_L (Harv Low Bnd)**: Lower bound of 80% confidence interval on harvest.
- **Harv_U (Harv Up Bnd)**: Upper bound of 80% confidence interval on harvest.
- **HarvU (Harvest Unknown):** Pt estimate of number of deer harvested of sex/age class unknown.
- **HarvY (Harvest Young):** Pt estimate of deer harvested of sex/age class young of year.
- **HarvF (Harvest Female):** Pt estimate of deer harvested of sex/age class non-young females.
- **HarvM (Harvest Male):** Pt estimate of deer harvested of sex/age class non-young males.
- **Buck_AU (Buck Antler Length Unknown):** Pt estimate of number of bucks harvested of antler length class unknown.
- **Buck_AL (Buck Antler Length <4"):** Pt estimate of number of bucks harvested of antler length <4". Legally antlerless.
- **Buck_AG (Buck Antler Length >4"):** Pt estimate of number of bucks harvested of antler length >4". Legally antlered.
- **Buck_B0 (Antlered Bucks No Brow Tines):** Pt estimate of number of antlered bucks harvested with no brow tine > 1" on either side.
- **Buck_B1 (Antlered Bucks with Brow Tine):** Pt estimate of number of antlered bucks harvested with at least 1 brow tine > 1" on either side.
- **Buc_BP0 (Antlered Buck Tine+Point Class 0):** Pt estimate of antlered bucks harvested with maximum one side brow tine and antler point count unknown or zero.
- **Buc_BP1 (Antlered Buck Tine+Point Class 1):** Pt estimate of antlered bucks harvested with maximum one side brow tine and antler point count of one.
- **Buc_BP2 (Antlered Buck Tine+Point Class 2):** Pt estimate of antlered bucks harvested with maximum one side brow tine and antler point count of two.
- **Buc_BP3 (Antlered Buck Tine+Point Class 3):** Pt estimate of antlered bucks harvested with maximum one side brow tine and antler point count of three.
- **Buc_BP4 (Antlered Buck Tine+Point Class 4):** Pt estimate of antlered bucks harvested with maximum one side brow tine and antler point count of four.
- **Buc_BP5 (Antlered Buck Tine+Point Class 5):** Pt estimate of antlered bucks harvested with maximum one side brow tine and antler point count of five.
- **Buc_BP6g (Antlered Buck Tine+Point Class 6):** Pt estimate of antlered bucks harvested with maximum one side brow tine and antler point count of six or more.
- **BuB0_P0 (Antlered Buck, No Brow Tines, Point Class 0):** Pt estimate of antlered bucks harvested with no brow tines and maximum one side antler point count unknown or zero.
- **BuB0_P1 (Antlered Buck, No Brow Tines, Point Class 1):** Pt estimate of antlered bucks harvested with no brow tines and maximum one side antler point count of one.
- **BuB0_P2 (Antlered Buck, No Brow Tines, Point Class 2):** Pt estimate of antlered bucks harvested with no brow tines and maximum one side antler point count of two.
- **BuB0_P3 (Antlered Buck, No Brow Tines, Point Class 3):** Pt estimate of antlered bucks harvested with no brow tines and maximum one side antler point count of three.
- **BuB0_P4 (Antlered Buck, No Brow Tines, Point Class 4):** Pt estimate of antlered bucks harvested with no brow tines and maximum one side antler point count of four.
- **BuB0_P5 (Antlered Buck, No Brow Tines, Point Class 5):** Pt estimate of antlered bucks harvested with no brow tines and maximum one side antler point count of five.
- **BuB0_P6g (Antlered Buck, No Brow Tines, Point Class 6):** Pt estimate of antlered bucks harvested with no brow tines and maximum one side antler point count of six.
- **BuB1_P0 (Antlered Mule Deer Buck, Brow Tines, Point Class 0):** Pt estimate of antlered mule deer bucks harvested with brow tine(s) and maximum one side antler point count unknown or zero.

- **BuB1_P1 (Antlered Mule Deer Buck, Brow Tines, Point Class 1):** Pt estimate of antlered mule deer bucks harvested with brow tine(s) and maximum one side antler point count of one.
- **BuB1_P2 (Antlered Mule Deer Buck, Brow Tines, Point Class 2):** Pt estimate of antlered mule deer bucks harvested with brow tine(s) and maximum one side antler point count of two.
- **BuB1_P3 (Antlered Mule Deer Buck, Brow Tines, Point Class 3):** Pt estimate of antlered mule deer bucks harvested with brow tine(s) and maximum one side antler point count of three.
- **BuB1_P4 (Antlered Mule Deer Buck, Brow Tines, Point Class 4):** Pt estimate of antlered mule deer bucks harvested with brow tine(s) and maximum one side antler point count of four.
- **BuB1_P5 (Antlered Mule Deer Buck, Brow Tines, Point Class 5):** Pt estimate of antlered mule deer bucks harvested with brow tine(s) and maximum one side antler point count of five.
- **BuB1_P6g (Antlered Mule Deer Buck, Brow Tines, Point Class 6):** Pt estimate of antlered mule deer bucks harvested with brow tine(s) and maximum one side antler point count of six.
- **TP_U (Harvest Time Unkn):** Estimate of deer harvested where time period was unknown.
- **TP_1 (Before Oct 24):** Estimate of deer harvested during 1st time period, pre-season.
- **TP_2 (Oct 24 – Oct 31):** Estimate of deer harvested during 2nd time period, 1st week.
- **TP_3 (Nov 1 – Nov 7):** Estimate of deer harvested during 3rd time period, 2nd week.
- **TP_4 (Nov 8 - Nov 14):** Estimate of deer harvested during 4th time period, 3rd week.
- **TP_5 (Nov 15 – Nov 21):** Estimate of deer harvested during 5th time period, 4th week.
- **TP_6 (Nov 22 – Nov 28):** Estimate of deer harvested during 6th time period, 5th week.
- **TP_7 (After Nov 28):** Estimate of deer harvested during 7th time period, post-season.
- **BO_N (Not Bow Kill):** Estimate of deer harvested by means other than bow and arrow.
- **BO_Y (Bow Kill):** Estimate of deer harvested by bow and arrow.

Deer Hunting Statistics were computed for certain combinations of values of the 2 variables Loc and Res:

Loc	Res	Explanation
STA	ALL	Statewide, combined residencies.
STA	R&N	Statewide, by residency.
R01..R07,R09	ALL	Regional, combined residencies.
R01..R07,R09	R&N	Regional, by residency.
###	ALL	Hunting district, all residencies.
###	R&N	Hunting district, by residency.

Deer Harvest Statistics were computed for certain combinations of values of the 4 variables Spp, Loc, Res, and Lpt:

Spp	Loc	Res	Lpt	Explanation
DE	STA	ALL	ALL	Combined spp, statewide, combined res and lic category.
DE	STA	R&N	ALL	Combined spp, statewide, by res, combined lic category.
DE	STA	ALL	Lp_Cat	Combined spp, statewide, combined res, by lic category.
DE	STA	R&N	Lp_Cat	Combined spp, statewide, by res and lic category.
DE	R01..R07,R09	ALL	ALL	Combined spp, regional, combined res and lic category.
DE	R01..R07,R09	R&N	ALL	Combined spp, regional, by res, combined lic category.
DE	R01..R07,R09	ALL	Lp_Cat	Combined spp, regional, combined res, by lic category.
DE	R01..R07,R09	R&N	Lp_Cat	Combined spp, regional, by res and lic category.
MD/WT	STA	ALL	ALL	By spp, statewide, combined res and lic category.
MD/WT	STA	R&N	ALL	By spp, statewide, by res, combined lic category.
MD/WT	STA	ALL	Lp_Cat	By spp, statewide, combined res, by lic category.
MD/WT	STA	R&N	Lp_Cat	By spp, statewide, by res and lic category.
MD/WT	R01..R07,R09	ALL	ALL	By spp, regional, combined res and lic category.
MD/WT	R01..R07,R09	R&N	ALL	By spp, regional, by res, combined lic category.
MD/WT	R01..R07,R09	ALL	Lp_Cat	By spp, regional, combined res, by lic category.
MD/WT	R01..R07,R09	R&N	Lp_Cat	By spp, regional, by res and lic category.
MD/WT	###	ALL	ALL	By spp, district, combined res and lic type.
MD/WT	###	R&N	ALL	By spp, district, by res, combined lic type.
MD/WT	###	ALL	Lp_Type	By spp, district, combined res, by lic type.
MD/WT	###	R&N	Lp_Type	By spp, district, by res and lic type.
